

## MOV Data Management Software Integrated Data Repository, Search and Query Tool

Powerhouse™ MOV data management software, by CRANE Valve Services, facilitates MOV program improvements by creating a single repository for all MOV data records. Because the value of any data management tool is defined by its ability to easily record and access data for analysis and reporting, Powerhouse™ establishes a higher standard for MOV program management by delivering instantaneous data access through search and query features.

The integrated and customizable modules allow the user to easily perform the following tasks:

### One Software Solution for All MOV Data Records

#### **Export**

Analyze, mark, select, and move tests into the database

#### **Calculate**

Perform secured calculations; revise, review, and approve calculations online (paperless)

#### **Setup**

Create multiple set point calculations for varying scenarios

#### **Evaluate**

Select tests for evaluation, review results, add comments, and print reports

#### **Schedule**

Automatically or periodically determine, review, track, stretch and plan for future test dates; evaluate work load, and/or plan for more efficient outages

#### **Trend**

Define a set of parameters, or define a set of valves with similar characteristics; get a snapshot of historical or current performance or a projection of performance over time

# Software Features

## SCALEABLE TO MEET YOUR REQUIREMENTS

Whether you have a single user, a few users, or a team of workers on a mainframe, this software is scaleable to meet your needs. Powerhouse™ MOV data management software can be utilized as a single-user product or can be installed on a LAN to accommodate multiple, simultaneous interfacing.

## CUSTOMIZABLE TO FIT YOUR NEEDS

Powerhouse™ MOV data management software is designed to operate for a variety of user-defined configurations. Because no two users have exactly the same MOV data management requirements, Powerhouse™ is customizable to interface with any compliant ODBC (Open Database Connectivity). Additionally, all six modules can be modified to fit your specific analysis and reporting requirements.

## COMPATIBLE WITH EXISTING TECHNOLOGY

Powerhouse™ MOV data management software is designed to work seamlessly with CRANE Valve Services Signature Software. It is compatible with any existing MOV data which has been previously stored utilizing Signature Software and any these CRANE Valve Services diagnostic systems—VOTES/DOS, MPM, 3000, 3500, Universal and Viper 20.

## UPGRADEABLE & PERFORMANCE DRIVEN

Powerhouse™ MOV data management software is designed to be modified, so that it can grow and change with your evolving needs. It is a performance driven product that provides a solution to the in-house, difficult-to-maintain, stand-alone systems you are currently utilizing to perform the full range of analyses required by today's MOV program.
